HYPNOTIC INTOXICATION

Having explored how the mind could replace addictive substances, Keith lays the groundwork for one of his most powerful educational presentations, Hypnotic Intoxication. Hypnotic Intoxication is a two-part program. The first part is a lecture on the powers that alcohol and addictive drugs play on our lives and how they affect the way we live and the ways in which we act. The second portion is a presentation in which Keith asks for volunteers to come on stage. Keith ends his presentation by closing with a powerful, motivational message that will allow your students to realize who they really are and what their future holds for them, and how to set their destiny. The reason that this program is so successful is that it allows students at the college level to experience an educational session in an entertaining way. Your students will enjoy the subject, and won't even realize they are learning an important issue that will affect their lives and everyone around them.
