

## Great Student Leaders Aren't Born They're Made

*The greatest skill that students need today is the ability to lead.*

Mike's **Great Student Leadership Aren't Born They're Made** program is a highly interactive and engaging program that leaves your students with the skills needed to make a difference on your campus. Whether they are leading in your clubs and organizations, on a sports team or in the classroom there are 4 specific elements of leadership that every successful leader must possess.

This program will have your students up and moving around interacting with other leaders learning the hard and soft skills need to be an effective leader on your campus. This program helps your students understand what type of leader they are and what areas of their leadership need improvement. Along with providing the leadership skills needed, your students will walk out with their top 5 goals as a leader so they can start working on them immediately.

Instead of just a rah rah session this highly interactive and engaging program will help your students identify and take their next step as a leader. Leadership is the pursuit of adding value to people. When students understand the value they bring to the table as a leader they will make a massive difference. Most students know **THAT** they need to lead but don't know **HOW**. This program answers that question in a tangible and engaging way!

### Learning Objectives and Takeaways:

- (1) Your students will walk away understanding the kind of leader they are wired to be.
- (2) Your students will walk away with their top 5 goals of a leader written down so they can start working on them right away.
- (3) Your students will understand the "Value Theory" and how it is the great equalizer in leadership (this tip is why ALL leaders are made).
- (4) Students will identify and face their greatest fear as a leader.
- (5) Students will walk out with their written definition of success as a leader.
